Attention: Mr. Scott George

RE: University of Toledo
Savage Hall Renovations and Expansion
MCI Project No. 6507.01

Dear Scott:

Now that the dust has settled and numerous basketball games have taken place on the hardwood. I wanted to take a moment to compliment you and your company for the excellent job and workmanship displayed by your craftsmen on the University of Toledo Savage Hall project. As we all know, some renovation projects are more difficult than others, but your onsite personnel was an asset to the project and to Henry Gurtzweiler, Inc.. The initiative displayed by you and your employees helped resolve project issues and coordination problems, considering the aggressive schedule and constraints we were dealing with for a major, high profile project.

The University of Toledo wanted me to pass on their thanks and gratitude for bringing Savage Hall "back to life". Initially, the University and public had their doubts if the old Centennial Hall would be a relevant and modern athletic facility for the 21st century, but they were all impressed after your hard work and efforts were completed. During the grand opening ceremony and basketball season, the public had nothing but praise for the new Savage Arena and Sullivan Athletic Complex. I want to compliment the efforts of your company and all of your employees for the overall success of the project. This project would not have been accomplished at this high level without the excellent team that we put on the floor. The Savage Hall project should be considered a "feather in your cap."

Sincerely,

MOSSER CONSTRUCTION, INC.
